DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 4/13/04 has been entered.

2. Applicant's response filed 4/9/04 and Applicant's amendments filed 12/5/03 and 7/17/03 are acknowledged and have been entered.

3. With regard to Applicant's corrected drawings filed 7/17/03, the proposed corrections are acceptable, however, since the corrections are handwritten, Applicant is required to file new drawings with the corrections incorporated other than by being handwritten.

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application as enunciated above. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

4. It is noted by the Examiner that Applicant has stated in the response filed 4/9/04 that "SEQ ID NOS: 14, 15, 16, 17 and 18 are not patentably distinct. As such, SEQ ID NOS: 15, 16, 17 and 18 should be examined."

Accordingly, the search has been extended to include SEQ ID NO: 15, 16, 17 and 18.

Claims 41-48 and 51 are pending and are presently being examined.

REASONS FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

Claims 41-48 and 51 are pending and are allowable.

The claimed isolated nucleic acid molecules which encode GAGE TRAPs, the nucleotide sequence of which are set forth in SEQ ID NO: 14-18, isolated transformed or transfected cells thereof, expression vectors thereof, and kit comprising one of the said isolated nucleic acid molecules are not taught or suggested by the prior art.
